1. Executive Summary: Overall Health

- **Pay Equity Compliance:** GE Healthcare’s Global Gender Pay Gap is currently **1.92%** (unadjusted). This is significantly below the **5%** threshold (upcoming regulation in Poland) and the EU average of **~13%**, indicating strong equity practices.
- **Market Competitiveness:** The majority of the workforce (**60%**) falls within the "Market" Compa-Ratio range (**90-110%**). Only **2%** of employees are flagged as "Underpaid" (**<80%**), confirming that salary bands are well-aligned with external market data.
- **Payroll Distribution:** Germany accounts for the highest portion of the total annual payroll, while France represents the lowest.

2. Critical Anomalies & Performance Analysis

- **Performance vs. Cost Outlier:** Employee's performance rating overall of value **3.24** is below the target of **3.5**. Analysis of the "**Top 10 Earners**" identified a misalignment in the IT Department. One high-earning employee (Top 10) currently holds a Performance Rating of **2**, significantly below the company average of **3.24**. This warrants a manager review.
- **Pav-for-Performance Correlation:** The compensation

Strategic Insights & Recommendations

Strategic Recommendations

- **Job Architecture Review:** While high pay for Directors with low tenure is expected, the data highlights "Entry Level" employees with significant tenure (**>7 years**). We recommend a Job Level Audit to ensure long-tenured staff are correctly promoted or re-leveled to reflect their experience.
- **Continue Bonus Strategy:** The scatter plot confirms a positive correlation between rating and bonus. Continue current allocation guidelines to maintain high-performer motivation.
- **Performance Optimization:** Instead of general reviews, implement targeted **Performance Improvement Plans (PIPs)** for employees consistently rating below the 3.5 threshold to address capability gaps proactively.
